26 YEARS OF ACADEMIC EXCELLENCE

Kanjirowa has made a flamboyant journey to prosper as a leading educational institution in the country. When we delve in our history in the Silver Jubilee year, we feel proud of all the little steps taken to build a remarkable activity-based school with progressive vibes. Over the past 26 years, we have expanded our learning activities, diversified our methodologies, incorporated learner-centered approaches and techniques, and made substantive progress collaborating with all our parents, various like-minded institutions and well-wishers.

INTRODUCTION

Kanjirowa National Secondary School (KNS) is an independent co-educational institution providing education in a resourceful, friendly and caring environment. Established in 1998 as Kathmandu Don Bosco School in New Baneshwor, Kanjirowa is run by a team of professionals with wide national and international experience in education.

Kanjirowa runs classes from Grades 1 to 12. After completion of Grade 10 Secondary Education Examinations (SEE), Kanjirowa offers Grade 11 and 12 education in Science and Management streams. Joining Science is to prepare oneself to pursue one of the diverse fields within pure and applied branches of science. Our Management stream grooms tomorrow's business entrepreneurs, top global executives, bankers, management academics and leaders.

The learning process is the most distinctive feature at Kanjirowa. New teaching methods and resources are regularly introduced. We involve our students in various Project-based Learning Activities. And in all these activities, we have our role as facilitators. We aim at making the students autonomous, lifelong learners, excelling academically and in all manners, growing up as good human beings and responsible citizens.

+2 SCIENCE

From your Grade XI, you can choose your future academic path. Joining Science is to prepare oneself to pursue one of the diverse fields within pure and applied branches of Science. Besides the most common fields such as medicine and engineering, it prepares students to enter the promising fields of 21st century such as biotechnology, information technology, pharmaceutical chemistry, nuclear physics and so on. Thus, students will be prepared to specialize in any area of their interest within the discipline of Science as a whole.

Kanjirowa has been an amazing resource for me, providing a resourceful, friendly and caring environment. The teachers are friendly, their ways of teaching are easy to understand and also the non-teaching staff provide great support and care. They have uplifted my personal growth and development, offering various counseling, mentorship and career oriented advice. The rich infrastructure of the college, its fully furnished laboratories for our practical assignment are the building blocks aiding my studies.

I am very indebted to Kanjirowa National Secondary School from academics to all kinds of ECA & CCA activities provided to us throughout. Accordingly, I am thankful for school and all the teachers and staff members for grooming my personality and making me a good human being.

Arayu Gainju, Grade XI (Science)

+2 MANAGEMENT

Management is what makes tomorrow's business entrepreneurs, top global executives, bankers, management scholars and leaders. The Plus Two program opens up students to the broad range of Management and Business Studies. Kanjirowa offers, wide options to students, covering diverse areas of management studies like Business Studies, Hotel Management and Computer Science. Kanirowa Management program trains the students to be the leading executives and academics in the field of global market.

I was very confused and distracted when I first joined for my higher studies. But when I entered Kanjirowa National Secondary School I was able to experience an amazing journey of my own. Teachers are very helpful along with all the team members and thus facilitated me to build my confidence. They have assisted me to learn more and unknown sides about myself.

Besides book-oriented studies, we also participate in various ECA & CCA activities which provide us different opportunities in the field of sports, Literature, public speaking and many more. All those activities conducted in Kanjirowa National Secondary School have paved my path towards a better and brighter future.

Kritika Bastola, Grade XI (Management)

WHY KANJIROWA ?

Kanjirowa National Secondary School is at the cutting edge of teaching and learning. New teaching approaches and programs are regularly introduced reflecting on awareness of our changing society and academic needs.
